CORRECTIVE ACTIONS:

1 CA# 165141

Corrective Action: Oil and gas operators shall implement and maintain Best Management Practices (BMPs) at all oil and gas locations Date: 10/21/2022

Response: CA COMPLETED Date of Completion: 10/10/2022

Operator Comment: Per the production supervisor for this location, the site is stable and BMPs are functioning as designed. The site was simply wet and muddy at the time that the COGCC inspector accessed the location. As needed, the location is periodically bladed to remove any ruts that were created by traffic accessing the location during / soon after a storm event.

COGCC Decision:

COGCC  
Representative:

--

**OPERATOR COMMENT AND SUBMITTAL**

Comment: Per the production supervisor for this location, the site is stable and the BMPs are functioning as designed. The site was simply wet and muddy at the time that the COGCC inspector accessed the location. As needed, the location is periodically bladed to remove any ruts that were created by traffic accessing the location during / soon after a storm event, and to maintain other BMPs as required. BMPs are designed to reduce and minimize sediment transport, not to completely prevent and eliminate sediment movement. This corrective action item has been addressed.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
