Best Management Practices

<u>No</u>	<u>BMP/COA Type</u>	<u>Description</u>
1	Noise mitigation	Operations will be in compliance with Table 423-1 requirements. Based off the rig sound signature, rig orientation will be considered to reduce noise levels to nearby building units.
2	Dust control	Water will be placed on dirt access roads to mitigate dust as needed.
3	Community Outreach and Notification	Courtesy notifications will be sent to all parcel owners with building units within 1,500 feet of the location letting them know about our subsequent well operations and providing contact information for Kerr McGee's response line and online resources.
4	Community Outreach and Notification	Signs will be placed in conspicuous locations and will include Oxy contact information; the Oxy Stakeholder Relations team will respond to all community member inquiries. The signs will be placed so as not to create a potential traffic hazard
5	Planning	Operations are daylight-only; no lighting impacts are anticipated from operations.
6	Wildlife	This location was reviewed using a desktop method to review publicly available wildlife data (including CPW & COGCC data) as well as internal wildlife datasets and aerial imagery. No risks were identified. All field personal are trained to identify wildlife risks and raise concerns noticed during operations with the Health, Safety, and Environment (HSE) department.
