Location ID: 480698

Photo 12. Photo taken from the western fill slope on 9/13/2022, facing North. Photo illustrates erosion along the fill slope that needs to be repaired during reclamation. The erosion is believed to be from a recent irrigation event by the surface owner.

Photo 13. Photo taken from the western fill slope on 10/11/2022, facing East. Photo illustrates erosion along the fill slope has been repaired but there appears to be movement of the slope. Operator is planning to implement additional BMPs to better stabilize the fill slope for long-term stabilization.
