(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Date of work When approval received

This well was completed as a "D" Sand producer on May 9, 1955. All possible zones of production have been depleted and we propose to plug and abandon per state regulations as follows:

We plan to pea gravel pack across "D" Sand perforations at 5494-5518', and 5522-26', spot 10 sacks of cement on top of pea gravel pack & shoot off 5½" OD casing at approximately 4600' & pull casing. 10 sack cement plugs will be set at both the top and the bottom of the surface casing and a 1/4" steel plate will be welded on top of the surface casing 18" below ground level. All equipment will be removed from the well and the location cleaned & leveled.
