REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? Yes

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Caerus proposes to remove the source of impacted material through soil vapor extraction (SVE) at the site. Once SVE exhaust PID readings indicate favorable conditions for remediation of the project, Caerus will install an adequate number of soil borings to demonstrate vertical and horizontal compliance with COGCC Table 915-1 standards.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Caerus proposes to remove the source of impacted material through soil vapor extraction (SVE) at the site. Once SVE exhaust PID readings indicate favorable conditions for remediation of the project, Caerus will install an adequate number of soil borings to demonstrate vertical and horizontal compliance with COGCC Table 915-1 standards. When site conditions indicate successful remediation is nearing, Caerus will propose soil boring locations for demonstration of compliance with COGCC Table 915-1 standards.

OPERATOR COMMENT

Caerus is providing the report of work completed from June 2021 which outlines the installation of soil borings within the remediation project area.

Due to trailer maintenance issues, Caerus was unable to complete an SVE event for the Remediation project during the Q2 2022 event. Caerus will continue to conduct quarterly SVE remediation events in the future.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
