RE: 909J Sampling Non-Applicability

To Whom it May Concern,

This well has an onsite pit that must comply with 909J sampling, effective on January 15th, 2021. The associated well has not produced water since 909J Rules have been made effective, making it incapable to grab a sample to represent the pit. Evergreen intends to complete the 909J sampling requirements when the well begins to produce water.

Sincerely,

Mackenzie Smith
