Comment:

This location does not comply with Rule 1004. Reclamation rules require reclamation activities to be conducted within three months of plugging on cropland. Well was plugged 11/17/1994. During this inspection, COGCC Staff observed pipe in the ground near the well location and that the access road has not been reclaimed. There was non-uniform vegetation cover resulting in bare soil near the location and the pit location was predominantly undesirable vegetation (e.g. kochia). It does not appear any reclamation work has been performed since the last FIR was submitted on 04/11/2018 (Doc #682503216). Refer to attached inspection photos.

Corrective Action:

Comply with Rule 1004. Collaborate with the landowner to determine mitigating measures that will allow reclamation work to be conducted in such a manner as to not interfere with agricultural activities or crop production. Provide documentation within the FIR Resolution form of when the corrective action work will be completed and provide date and documentation of coordination with the surface owner.

Corrective action date is being backdated to when the previous Reclamation Staff observed the location was out of compliance.

Date **04/10/2018**
