General Comment:

This is a follow-up Final Reclamation and Stormwater Inspection for PA Well API#075-07464 and its associated tank battery. Well was plugged and abandoned 10/27/2015. Previous inspection (FIR Document #697501084) documented a complaint associated with the location and that the location did not comply with Rule 1004 Final Reclamation standards at the time of inspection (02/10/2020).

This inspection is also in response to a bond release request. Sundry document #401794346 stated Final Reclamation is complete and ready for inspection.

Any corrective actions from previous inspections are still applicable.

Comment: _____

	<p>This location does not comply with Rule 1004. Reclamation rules require reclamation activities to be conducted within three months of plugging on cropland. Well was plugged 10/27/2015. During this inspection, COGCC Staff observed that the location and access roads have not been reclaimed as the disturbance area vegetation was not reflect of the reference area crop. Gravel and undesirable vegetation (e.g. kochia) remain throughout the location and access roads, the location does not appear to have been decompacted, and subsidence is evident in areas of the location. Refer to attached inspection photos at the end of this report.</p>	
Corrective Action:	<p>Comply with Rule 1004. Collaborate with the landowner to determine mitigating measures that will allow reclamation work to be conducted in such a manner as to not interfere with agricultural activities or crop production. Provide documentation within the FIR Resolution form of when the corrective action work will be completed and provide date and documentation of coordination with the surface owner.</p> <p>Corrective action date is being back dated to when all final reclamation activities should have been completed.</p>	Date 01/27/2016
