General Comment:

Inspection to confirm wellhead cut and capped and status of equipment removal and reclamation. Wellhead/casing cutoff stub observed and below grade plate has been backfilled. No equipment has been removed, tanks and propane tank still on site, sucker rods coated with E&P waste on ground, no spill prevention measures, several oily patches.

Based on surface plug set 10/15 and cut and cap 10/20 all equipment must be removed and flowlines abandoned by 12/4/22 based on time frames and deadlines defined in AOC (Order 1V-782), "no later than 45 days of plugging the well"

Location

Good Housekeeping:			
Type	OTHER		
Comment:	E&P coared sucker rods with crude oil impacting surface material noted in previous inspoection doc#702500604 still present, no spill response or clean up of free oily waste on ground. Percipitation will cause more oily wastes to come off equipment.		
Corrective Action:	Clean up oily waste belwo and near sucker rods, employ spill prevention/response measures per rules 1002.f and 905, previous CA date retained.	Date:	10/14/2022
