General Comment:[This is a Construction and Stormwater Inspection in response to Form 42: Notice of construction- Document #403198643.](#)

Location Construction

Location ID: 483006 CDP: _____

Comment: Per Rule 406.c. a copy of the approved Form 2A, and any Form 4 modifying the approved Form 2A, will be posted in a protected and conspicuous place on location upon commencement of operations with heavy equipment until the conclusion of interim reclamation. Staff did not observe the required paperwork and the contractor stated they did not have it. Based on drone aerial imagery, this is in compliance with the approved Form 2A for the permitted disturbance area.

Corrective Action: Comply Rule 406.c.

Date: 10/20/2022

Comment _____

Corrective Action _____

Date _____

1002b. SOIL REMOVAL AND SEGREGATION Pass

Comment

Appears topsoil was salvaged and stored along the northern and southeastern perimeter of the location in compliance with Rule 1002.b. Based on drone technology, the Operator has salvaged ~9900 cubic yards of topsoil which is ~6" of topsoil. Refer to the attached inspection photos.

1002c. PROTECTION OF SOILS In Process

Comment

At the time of this inspection, construction operations were underway.

Per Rule 1002.c., all stockpiles shall be protected from degradation due to contamination, compaction and, to the extent practicable, from wind and water erosion during drilling and production operations. Per Rule 1002.c., BMPs to prevent weed establishment and to maintain soil microbial activity shall be implemented.

Corrective Action _____

1002E. SURFACE DISTURBANCE MINIMIZATION In Process

Comment

Per Rule 1002.e.(1), Operator shall adequately construct and stabilize the entire well pad area, including cut and fill slopes, to control dust and minimize erosion, alteration of natural features, removal of surface materials, and degradation due to contamination.

COGCC Comments

Comment	User	Date
Per Rule 1002.f., oil and gas operators shall implement and maintain Best Management Practices (BMPs) at all oil and gas locations to control stormwater runoff in a manner that minimizes erosion, transport of sediment offsite, and site degradation. BMPs shall be maintained until the facility is abandoned and final reclamation is achieved pursuant to Rule 1004. Operators shall employ BMPs, as necessary to comply with this rule, at all oil and gas locations, including, but not limited to, well pads, soil stock piles, access roads, tank batteries, compressor stations, and pipeline rights of way. BMPs shall be selected based on site specific conditions, such as slope, vegetation cover, and proximity to water bodies, and may include maintaining in-place some or all of the BMPs installed during the construction phase of the facility. Where applicable based on site-specific conditions, operators shall implement BMPs in accordance with good engineering practices.	binschusc	11/08/2022
