Comment:

To address safety and environmental issues, the valve connecting the domestic gas tap has been replaced to ensure it meets current regulations despite LOGOS having no ownership or operation of said valve. Currently, LOGOS has no access to the property and is therefore unable to access the landowner-owned flowline. LOGOS is currently contacting the landowner controlling and owning the lines leaving the gas tap. When a resolution with the landowner has been reached, the form 44 will be submitted as soon as reasonably practicable.
