Permit	<p>Per COGCC GIS department:</p> <ol style="list-style-type: none"><li>1. The boundary needs to be a polygon. It is currently a polyline</li><li>2. Both features need to have a "FeatTyp" field. That field needs to be populated with "project boundary," "energy source point," or "receiver location"</li><li>3. They need to follow the instructions on page 15 of the document for the proper naming convention - "filename.shp.zip"</li></ol> <p>Please read the GIS Data Attachment Guidance that was provided and resubmit once the proper procedure is followed. Returned to draft.</p>	11/04/2022
