Comment:

Upon receipt of COGCC Field Inspection Form Document Number 702800728 dated 9/16/22 and received 9/23/22, Gulf Exploration LLC immediately contacted Ecopoint, Inc. for a recommendation. EcoPoint recommended to Inter-Seed where cheatgrass is dominated, as Inter-Seeding will mitigate cheatgrass on this reclamation by bolstering native grass populations to overtake the cheatgrass found on site and has been

accepted as a way to lessen cheatgrass spread on other sites in similar situations.
On 10/6/22, EcoPoint made a site visit to take photos and prepare a seeing area map to assist in outlining some of the areas with heavier cheatgrass established.
On 10/12/22, we received a quote from Advanced Contracting Group, LLC for the Inter-Seeding Job.
On 11/8/22, Justin Keith, Reclamation Specialist with Solomon Environmental, met with Advanced Contracting Group, LLC to Inter-Seed using a Pawnee Buttes Seed Custom Mix. A Corrective Actions Report is attached for reference.

2 CA# 164761

Corrective Action: Conduct additional reclamation in accordance with COGCC 1000 series rules. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local soil conservation district. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be completed no later than 11/15/2022.
