Comment:

	<p>During this inspection, COGCC Staff observed that the well location was recently revegetated with evidence of germination in drill rows. The tank battery location was predominantly undesirable weedy vegetation (e.g. kochia) and had evidence of vehicle traffic through the reclaimed area. It appears the location's access road is currently being used by a water district (United Water and Sanitation) as wells, pumps, and associated equipment were evident near the location. The access road will need to be reclaimed in order to reach final reclamation standards. Refer to the attached inspection photos.</p>	
Corrective Action:	<p>Comply with Rule 1004. Operator shall reclaim the access road, manage location for undesirable vegetation, and reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.</p> <p>Corrective action date is the date the location was observed out of compliance.</p>	Date 11/02/2022
Overall Final Reclamation	Fail	Well Release on Active Location <input type="checkbox"/>
	Multi-Well Location	<input type="checkbox"/>
