Surface Owner: FEE

Other(Specify): Caerus

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

The previous operator shut in all producing wells in October of 2021, Caerus purchased the asset in 2022 and has not put the pipeline back in service. Caerus has been conducting pressure testing on the pipeline and isolating and repairing failed valves. Through this process Caerus has identified an approximate pipeline failure point and is excavating the location to identify the point of release. Caerus will sample and define the historic vertical and horizontal impacts, all potential impacts would have been from the previous operators use of the pipeline.
