**COMMENTS:**

To satisfy a COA of an approved annual Form 4 (Doc #402633498) submitted 3/23/2021 for the Bolton #1-8 and at the request of the COGCC engineering staff, Renegade submits this Form 4 updating the planned utilization for the subject well. Renegade has had recent discussions with Black Hills Energy about returning the small gathering system servicing the well back into active status. Very early evaluation of utilizing other wells on this system for gas storage for the local LDC is also being considered which would help facilitate this well to be returned to production. Based on the Bolton #1-8 shut in pressure, substantial reserves remain to be produce. For these reasons it is desirable to retain this well as a TA'd well.

Operator Comments:

Even though annual TA status updates are no longer required to be filed for TA'd wells, Stephen Wolfe of the COGCC engineering staff has requested in response to a previous Form 4 COA for the Bolton #1-8 that this Form 4 be filed. This well will be held for possible return to production if the gathering system previously serving the well can be reactivated. Recent conversations have been had with Black Hills Energy toward this goal. Additional discussions are scheduled for early December between the parties.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
