Commission

Department of Natural Resources

Inspection Photos
Location Name: Leech 1
Location ID: 319807

Photo 1. Taken from the southern portion of the well location, facing northwest. It appears the operator has performed final reclamation work with no visual evidence of oil and gas equipment. This well is on a shared tank battery location (319807) that is currently “shut in” with plans for abandonment. This location will be re-inspected at a later date to verify vegetation, and final reclamation activities for the tank battery location.
