COGCC Comments

Comment	User	Date
All disturbed areas properly decompacted by cross ripping to a depth of 18 inches, have an adequate seedbed prepared, and then seeded with a seed mixture that reflects the surrounding vegetation. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Continue to monitor and maintain the location until the final reclamation requirements are achieved.	CostaR	12/05/2022
