General Comment:

On 12/5/2022, Reclamation Specialist Trujillo conducted a final reclamation inspection at PRE Resources Inc's Government Buttram 1 location in Garfield County, Colorado.

This inspection is a followup to #696203758, and #696204007 to document compliance with the following:
 -1004.a- Final Reclamation

It was observed in this inspection that Location remains out of compliance with COGCC Rules and Corrective actions

Refer to the "Reclamation" and "Stormwater" section of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Comment:

Corrective Action:

Date **07/31/2022**

Comply with 1004 rules and conduct final reclamation of the Location including by not limited to compaction alleviation, recontouring and revegetating; conduct weed management and continue to monitor/manage Undesirable and Noxious plants to prevent further spread and establishment. Weed management is required until site receives a passing final reclamation inspection.

Overall Final Reclamation **Fail** Well Release on Active Location Multi-Well Location

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: Inspection #696204007 observed that BMPs to control stormwater runoff in a manner that minimize erosion, sediment transport and site degradation are missing from the access road, and cut slopes of the Location; gully erosion evident. Inspection required Operator to comply with 1002.f, and the temporary BMPs are required until final reclamation work is completed, at which point additional BMPs will be required to stabilize the seeded soils and reclamation areas.

It was observed in this inspection that stormwater and erosion control BMPs remain missing or insufficient; unable to find evidence that work to address the CA was conducted; erosion degradation has persisted. Original CA and CA date remains applicable.

Corrective Action: Comply with 1002.f; implement and maintain stormwater and erosion control BMPs in accordance with good engineering practices. Ongoing stormwater monitoring/management required until site receives a passing final reclamation inspection.

Date: 08/25/2022

Pits: NO SURFACE INDICATION OF PIT

COGCC Comments

Comment	User	Date
<p>COMMENT #1</p> <p>Inspections #696203758 and #696204007 observed that final reclamation has not been completed; Location and access road have not been decompacted, recontoured and reclaimed- Cut/fill slope remains evident and working pad has been left flat, secondary containment berms remain evident, gravel has not been removed; surface equipment (pipe) remaining on northwest end of the Location; Vegetation on Location is predominantly Undesirable and Noxious Plant Species including, but not limited to, Field Bindweed, Redstem filaree, Hoary Cress, etc... Inspections required Operator to comply with 1004 Rules.</p> <p>It was observed in this inspection that 1004 final reclamation work including, but not limited to, compaction alleviation, recontouring/regrading, revegetation has not been conducted; due to the onset of winter conditions, remaining noxious weeds on site have become dormant, or have died- weed management efforts do not appear to have been conducted, as no resolution has been submitted by Operator stating corrective actions were taken. Erosion degradation remains evident along cut slopes (see "Stormwater") CA has not been addressed and remains applicable.</p>	trujilloam	12/06/2022
