## Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

Pursuant to COGCC Rule 911 a site investigation was conducted pertaining to the LILLI UNIT 08-01 wellhead cut and cap. The 5300' of flowline is a shared flowline with the LILLI UNIT 08-01 and will be abandoned when the other wells on the line are cut/capped. No portion of the flowline was removed therefore no flowline checklist was filled out.
