Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? Yes

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

IMPACTED SOIL ON THE ACCESS ROAD WILL BE REMEDIATED. IMPACTED SOIL IN THE EPHEMERAL DRAINAGE IS INACCESSIBLE. HOWEVER, SAMPLES HAVE BEEN COLLECTED TO DETERMINE THE HYDROCARBON IMPACTS, IF ANY.

Update 7/25/2022: If samples were collected, record retention files have been purged from 2010 and older by remediation contractors and laboratory companies. As well as contractors/subcontractors and laboratory services involved in 2007 are no longer in business and/or have changed ownership, also resulting in record destruction.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Remediation of the produced water that was released onto the pad and down the access road was conducted between 3/4/2007 and 3/6/2007. As outlined within the approved Form 27 on the COGCC database (Doc# 2057354), the excavated material was removed and placed within the reserve pit on location (PA 13-27).

A site visit is being proposed to evaluate the spill area and collect necessary samples to demonstrate compliance with COGCC Table 915-1.

OPERATOR COMMENT

Please forward onto John Heil

In response to NOAV Doc# 403003375, this Supplemental Form 27 is being submitted to provide information for the PA 13-27 (REM# 3904) that occurred in 2007.

A database and records review was performed by TEP personnel consisting of records request from contractor and subcontractor personnel assisting with remediation of the produced water release. Additionally, TEP requested that analytical laboratories used during the 2007 timeframe research their archive folders for any data pertaining to the PA 13-27. All responses received indicated that historical documents from 2010 and older have been purged and are no longer available.

However, it was discovered from the spill response contractor on an old camera memory card, photographs of the release and remediation efforts. It appears that remediation of the produced water that was released onto the pad and down the access road was conducted between 3/4/2007 and 3/6/2007. As outlined within the approved Form 27 on the COGCC database (Doc# 2057354), the excavated material was removed and placed within the reserve pit on location (PA 13-27).

TEP is proposing to conduct a site visit to evaluate current conditions of where the release occurred and obtain confirmation sample(s). Analysis will consist of the newly implemented Table 915-1 analysis.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.

Signed: Kris Rowe

Description

	Operator shall comply with Rule 913.b.(2) and conduct sampling and analysis of soil pursuant to Rule 915 to determine the horizontal and vertical extent of any contamination in excess of the cleanup concentrations in Table 915-1 or in WQCC Regulation 41 numeric and narrative Groundwater quality standards and classifications, as incorporated by reference in Rule 901.b.
	On a Form 27 Supplemental, Operator shall provide the corrected lat/long for the Spill/Release under the Site Information section of the form.
