General Comment:

On December 6, 2022, COGCC Environmental Staff (Alex Fischer) conducted a field inspection of KP Kauffman Company (KPK) Dwinell (Location ID: 324591). The inspection was a follow up to Spill ID 473059 and REM 15326. Weather was sunny with some cloud cover, temperature about 27 degrees Fahrenheit, and snow cover on the ground.

The following is a summary:

- Jeff and Juan were off loading fluids from a produced water tank at the time of inspection.
- Jeff stated that "several" loads of impacted material had been transported to the Front Range (he mentioned Erie Landfill) about 3-weeks ago.
- E&P impacted waste still present in bermed area west of the tank battery.
- Chemical tote Paraffin Solvent in lined secondary containment. Note: The secondary containment has an approximate 6' to 8' hole in it. This has been noted in previous inspections.
- Pit Facility ID 115273 covered with snow.
- Any corrective action(s) and corrective action due dates from previous inspections that have not been addressed are still applicable.
