Kevin and Craig,

COGCC is returning Document #403198745 for Remediation 15773 to draft. Based on a project review and COGCC inspections all of the waste manifests provided cannot be associated with this incident.

Spill Date was 11/7/2019. Some Waste manifests included pre-date the spill date.

Per the Form 19 supplemental the area of impacts is 10x10x5; these manifests are for a significantly larger excavation. Initial Excavation photos (11/14/2019 and 12/2/2019):

COGCC inspections on 7/12/2021 and 2/14/2022 indicate no change in disturbance. This is supported by Google Earth imagery which shows no changes since 6/6/2020. However some of the manifests provided are from within this time frame:

Please review the waste manifests and determine which ones are for this incident, correct the volume of removed soil, and resubmit. Additionally, while the form is in draft please revise the Operator anticipated the remaining cost to reflect the scope of work remaining.

Nikki Graber, P.G.
DJ Basin Region Environmental Supervisor
