Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

OPERATOR COMMENT

No work on this project was completed during the third quarter of 2022. The wellhead was plugged and abandoned between 8/12/2022 and 8/18/2022 and the wellhead was cut and capped on 9/30/2022. On 10/7/2022, additional closure samples were collected from the excavation completed to cut and cap the well to verify if all impacted soil was removed. Results of these samples indicated that impacted soil remained in the subsurface. On 11/9/2022, additional soil was removed from the subsurface and confirmation samples were collected. The results of these samples will be presented in a future form submittal.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
