COLO. OIL & GAS CONS. COMM.

Sirs,

We performed the following work on the above lease. This letter should be attached to a Form 4, and forwarded to the Colorado Oil and Gas Commission.

Set a CIBP at 6050' and spotted 2 sacks of cement.  
Fill the hole with mud.  
Freepoint and cut casing at 3347'.  
Set 35 sacks of cement at base of surface pipe from 240' up.  
Set 10 sacks at surface.  
Cut the wellhead off 4' below surface, welded a plate.  
Backfilled the hole.

All cement was 50/50 poz, yield is 1.26 cu. ft./sack, weight is 14.1 ppg.

Sincerely,
