2 ☒ CA# 166033

Corrective Action: Remove stored equipment

Date: 11/25/2022

Response: CA COMPLETED

Date of Completion: 11/16/2022

Operator Comment: TEP's Land Department contacted the land owner and asked him to remove the sections of irrigation side roll sprinklers that have blown onto the location. The land owner stated that he understood the need to move the sections of irrigation pipe, and would move them in the near future. TEP will continue to monitor the location and remind the land owner as needed that the pipe must be moved and secured off of the location.

COGCC Decision: Approved pending re-inspection

3 ☒ CA# 166034

Corrective Action: Install or repair required BMPs

Date: 05/31/2021

Response: CA COMPLETED

Date of Completion: 12/16/2022

Operator Comment: TEP has maintained and bladed the pad surface on multiple occasions since 5/31/21. As with many locations, the pad surface becomes soft after large storm events or when the frozen ground surface thaws with warmer temperatures, and is susceptible to minor rutting when vehicles drive on the surface. TEP's production supervisor ensures that this location is routinely bladed / maintained to remove ruts from the pad surface and to prevent off-site tracking of sediment. TEP has a vested interest to ensuring that the access roads and pad surface are maintained in good working condition so that we can continue to access and produce this location. The location was recently bladed on 12/16/22 (see attached photos).

OPERATOR COMMENT AND SUBMITTAL

Comment: TEP has maintained and bladed the pad surface on multiple occasions since 5/31/21. As with many locations, the pad surface becomes soft after large storm events or when the ground thaws in the Spring time, and is susceptible to minor rutting when vehicles drive on the surface. TEP's production supervisor ensures that this location is routinely bladed / maintained to remove ruts from the pad surface and to prevent off-site tracking of sediment. TEP has a vested interest to ensuring that the access roads and pad surface are maintained in good working condition so that we can continue to access and produce this location. The location was recently bladed on 12/16/22 (see attached photos).

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
