CORRECTIVE ACTIONS:

1  CA# 161186

Corrective Action: The previous corrective action remains open. COGCC Staff is contemplating the next steps to be performed and will be in coordination with the Operator. Date: \_\_\_\_\_

Response: CA COMPLETED Date of Completion: 11/02/2022

Operator Comment: Please see attached topsoil site assessment report. After reviewing the discrepancy between what the construction company reported and the drone calculation from COGCC, Summit elected to hire a third party (RPG Resources) to verify the COGCC volume. The construction company was fired and a different construction

company was hired for all future location construction as the topsoil volume stockpiled by the construction company is approximately 50% of what was reported to the operator and the COGCC.

COGCC Decision: Approved pending re-inspection

COGCC Representative: Operator complied with the previous corrective action to perform a topsoil site assessment which demonstrated that the Operator failed to salvage approximately 50% of the topsoil during construction operations.

NOTE: COGCC Staff will be issuing a follow up corrective action inspection requiring the Operator to import the amount of topsoil that was not salvaged.
