Comments:

The former JEFFRIES, JAMES M 32-11 #2 well (API: 05-005-06240) was P&A'd on June 22, 1987, according to Form 6 Document Number 00506240. On November 10, WSP conducted a final reclamation inspection for the former JEFFRIES, JAMES M 32-11 #2 well pad (Location ID: 377786). The reclaimed well pad was seeded with a native prairie seed mix. The reclaimed location is situated on non-irrigated pasture and has been returned to that land use. A modified line-point intercept vegetation survey was conducted on the reclaimed well pad and on adjacent reference areas for comparison. Foliar and basal cover, along with non-vegetated, and noxious weed occurrences were documented. A total of 50 survey points along a 50-foot transect were recorded within the reclaimed disturbance area and 50 survey points along a 50-foot transect were recorded within the reference area. Undesirable species, if present, were excluded from the vegetative coverage calculation. Survey results indicate the reclaimed area has a foliar vegetative cover that is 93% of the undisturbed reference area. The associated TB location is unknown. The inspection and vegetation survey indicate that final reclamation has been achieved in compliance with COGCC Rule 1004, which applies to the reclamation of non-crop lands. WSP personnel located the P&A wellhead location using a handheld Trimble (R1) Global Positioning System (GPS) unit and latitude and longitude coordinates obtained from the COGCC online database.
