INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Pursuant to COGCC Rule 911 a site investigation was conducted pertaining to the SANDAU 34-12F wellhead cut and cap and flowline abandonment. Approximately 490' of flowline was abandoned-in-place. The wellhead was cut and capped per COGCC rules.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

- ☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

One (1) grab soil sample was collected at the wellhead excavation. The wellhead soil sample was analyzed by a certified laboratory for TPH (total volatile [C6-C10] and extractable [C10-C36] hydrocarbons), organic compounds in soil per COGCC Table 915-1, EC, SAR, pH, and boron. One (1) waste characterization sample for COGCC Table 915-1 metals was collected.

One (1) grab soil sample was collected at the flowline terminus. The flowline soil sample was analyzed by a certified laboratory for TPH (total volatile [C6-C10] and extractable [C10-C36] hydrocarbons), organic compounds in soil per COGCC Table 915-1, EC, SAR, pH, and boron.

All samples collected were analyzed by a certified laboratory using approved COGCC laboratory analysis methods.

Proposed Groundwater Sampling

☒ Is further site investigation required?

A site assessment will be scheduled to delineate impacted media identified at WH-FS-01@6'. Chevron proposes soil samples will be collected adjacent to WH-FS-01 for analysis of TPH (C6-C36), organic compounds in soil per COGCC Table 915-1, and arsenic.

If groundwater is encountered during the subsurface assessment, each soil boring will be completed as a monitoring well and the groundwater will be sampled for BTEX, naphthalene, 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, 1-methylnaphthalene, and inorganic parameters.

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

No source was generated. A site assessment will be completed prior to December 31, 2022 or following land approval/harvest to delineate residual soil impacts at the site. Chevron proposes soil samples will be collected adjacent to WH-FS-01 for analysis of TPH (C6-C36), organic compounds in soil per COGCC Table 915-1, and arsenic.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

A site assessment will be completed to determine the applicability of GSSLs at the site. Remediation will be proposed in a supplemental report if applicable. NFA will be considered when soil is in compliance with COGCC Table 915-1 regulatory limits.
