All,

Before approving a transfer, I always run the diagnostic tool one more time. Unfortunately, there are three additional Field Inspection Reports that will need to be accounted for. The document numbers are as follows:

- #706700074
- #706700132
- #706700137

These corrective actions may or may not have been resolved. FIRs with outstanding corrective actions are transferable items that must be accounted for in the Form 9 in one or more of the following ways.
