Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27.

This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

**INITIAL ACTION SUMMARY**

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

After the fire at the tire windbreak was extinguished by covering the tires with soil, the tire debris and approximately 144 cubic yards of soil was hauled to a landfill on 1/16/2021.

**REMEDIAL ACTION PLAN**

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan?   No  

**SOURCE REMOVAL SUMMARY**

Describe how source is to be removed.

Soil in the impacted area will be scraped and contained in a tarp or roll off. Soil impacted by tire windbreak fire will be hauled to a local landfill.

**REMEDIATION SUMMARY**

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

If the proposed plan is approved by the COGCC, the soil removal will commence on 4/6/2021. The operator will remove impacted soil outside the fenced area and also inside the fence where the tire windbreak was formerly located. An independent contractor will conduct at least 2 soil samples in the impacted area along with at least 1 background sample. The results of soil samples are expected to be received during the week of 4/12. After receipt of the soil samples, assuming table 915-1 levels are satisfactory, the operator will formulate a reclamation plan for the impacted area. The surface tenant has requested that the operator replace the windbreak. The operator will replace top soil and conduct seeding operations at the impacted site prior to erecting the replacement windbreak, which will be constructed with metal pipe.
