900 Patterson Building  
Denver 2, Colorado

Gentlemen:

We are forwarding ten prints of the hydrocarbon analysis log on your Gulf States 8-90 No. 1 well in Moffat County, Colorado. The section logged was from 310' to 3173'.

This well was logged by our Special Well Logging Service. Our engineer Mr. C. G. Harger, who operated this equipment, logged the cuttings samples for lithology, porosity and oil fluorescent cuts. The gas from cuttings was run at various intervals of interest.

In reviewing the results of our log we feel that all pertinent data contained is self-explanatory. If we can be of further assistance in the interpretation of this log please advise and we shall be glad to call on you at your convenience.

We wish to thank you and your personnel for the consideration and cooperation shown us in securing the information on this well.

Yours very truly,

ROTARY ENGINEERING COMPANY
