Operator Comments:

Final reclamation of the G11SE well pad was completed in 2015. The well pad was recontoured and seeded with a pasture mix requested by the surface owner. 2022 qualitative and quantitative vegetation surveys show that final reclamation of the well pad disturbance is successful and a self-perpetuating desirable plant community has been reestablished that approximates adjacent reference area composition and cover. Please see the attached third-party vegetation survey report indicating that the reclaimed surface meets Rule 1004 standards. The surface owner's Final Reclamation Variance Request to retain the access road was approved during the 1/04/2023 COGCC Commission Hearing (Docket #210900148, Order # 1-297). A PVC pipe riser remains near the pad entrance with barrier fencing: This infrastructure is not associated with the oil and gas location (See approved FIRR # 402212191). A cattle exclusion perimeter fence is present around the reclaimed well pad and will remain in place to prevent cattle grazing until the Well Site receives a passing final reclamation inspection with COA for removal. The fence will then be removed and a subsequent Sundry will be provided to document removal. Caerus respectfully requests that a final reclamation inspection be completed during the 2023 growing season to ensure the site is returned to the Surface Owner in a timely manner.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.

CONDITIONS OF APPROVAL, IF ANY:

COA Type	Description
	<p>Approval/Passing of the form 4 acknowledges that the Oil and Gas Conservation Commission has received the notice. It is not an acknowledgement that reclamation has been passed. A field inspection will be conducted at a future date to evaluate compliance with reclamation standards.</p> <p>At a minimum, Final Reclamation shall be conducted in accordance with 1004.a requirements.</p> <p>Please note: Location cannot receive a passing final reclamation inspection with the cattle exclusion perimeter fence present. Reclamation Specialist will inspect the location to evaluate compliance with 1004 Standards. If standards are met, Caerus must remove fence before receiving a passing final inspection. Upon receipt of a Form 4, indicating the fence has been removed, the Reclamation Specialist will promptly reinspect the location.</p>
