Subject: Notice of release - Koch Tank Battery and Separator
Attachments: Koch Tank Battery Site Location and Topo.pdf

Good afternoon, Brandon:

I am reaching out because we have identified impacted soil and groundwater that is within 300 feet of mapped surface water and wetlands at the Koch Tank Battery project for KP Kauffman Company. No high priority habitats were identified. Our planned field activities include source removal via excavation, backfilling the excavation and reclaiming the site. I've included site information below and attached 2 site maps. If anticipated site work expands from this site work, we will reach back out again prior to field work. We are reaching out to you as part of the Form 19 release reporting process.

Client Name: KP Kauffman Company Inc.

Site Name: Koch Tank Battery and Separator

QtrQtr: NENE Sec: 6 Twp: 1N Range: 68W Meridian: 6

Coordinates: 40.08004, -105.03767

Field Activities: Excavation and backfill followed by reclamation

Please feel free to contact me with any questions you may have while reviewing this information.

Respectfully,

Kevin Tautkus, P.G. / Senior Project Manager
