Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

OPERATOR INFORMATION

Name of Operator: <u>KERR MCGEE OIL & GAS ONSHORE LP</u>	Operator No: <u>47120</u>	Phone Numbers
Address: <u>P O BOX 173779</u>		Phone: <u>(720) 929-4306</u>
City: <u>DENVER</u>	State: <u>CO</u>	Zip: <u>80217-3779</u>

DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	GROUNDWATER	TBD	Groundwater samples/lab analytical results
Yes	SOILS	TBD	Soil vapor samples/lab analytical results

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

This form has been prepared to provide prior notice of the plugging and abandonment of the Sherwood L30-30D wellhead and removal of the associated flowlines. This is in addition to the plugging and abandonment of the Sherwood L Fed 30-29D wellhead, as proposed in the Form 27 Initial dated August 24, 2022 (Document No. 403143355). The flowline systems pre-abandonment notices were submitted under Form 44 Document No.'s 403131936, and 403225210. In accordance with COGCC Rule 911.a., soil and groundwater (if present) samples will be collected and submitted for laboratory analysis to determine if concentrations and values are in compliance with COGCC Table 915-1. Visual inspection and field screening of soils around each wellhead and associated flowlines will be conducted during sampling activities. Soil vapor screening will also be performed around each wellhead. The topographic Site Location Map showing the geographic setting of the site is provided as Figure 1. The cut and cap work has not yet commenced at the site.

During routine testing activities at the Sherwood L30-30D wellhead, five shallow soil vapor points were installed in the vicinity of the wellhead. The points were monitored on August 17, 2022. Methane was detected at two of the five points with a GEM 5000 meter. Samples were collected and submitted to Isotech Laboratories for gas composition analysis. Sample results and analysis was received on August 24, 2022 and indicated the presence of thermogenic gas. The presence of stray gas was reported in a Form 19 Initial dated August 25, 2022 (Document No. 430146527). The volume of the release is unknown. An investigation into the nature and source of the soil gas is on-going. The original soil vapor points have been destroyed during plugging and abandonment activities. New soil vapor points will be installed to continue the assessment activities. The proposed soil vapor points are depicted on Figures 4 and 5.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Following wellhead cut and cap operations, soil will be field screened at the wellhead, separator riser and associated flowline. Samples will be collected if indications of impacts to soil or groundwater are present. If impacted soils are encountered, a waste characterization soil sample will be collected from the areas exhibiting the highest degree of impact based on visual, olfactory, and/or field screening observations. In the absence of apparent impacts, a soil sample will be collected from the base of the excavation adjacent to the wellhead, adjacent to the wellhead riser, adjacent to the separator riser, and the areas most likely to have been impacted during the operational life of the flowline. Soil samples will be submitted to an accredited laboratory for analysis using standard methods appropriate for detecting the target analytes in COGCC Table 915-1. Proposed soil sample and screening locations are provided on Figures 2 and 3.

Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

If groundwater is encountered during facility decommissioning activities, a minimum of one grab sample will be collected as soon as practical. Groundwater samples will be submitted to an accredited laboratory for analysis of benzene, toluene, ethylbenzene, total xylenes (BTEX), naphthalene, 1,2,4-trimethylbenzene (1,2,4 – TMB), and 1,3,5-trimethylbenzene (1,3,5 – TMB), using standard methods appropriate for detecting the target analytes in COGCC Table 915-1.

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan (summary):

If no impacts are observed, a minimum of one soil sample from the wellhead, separator riser, and associated flowline excavations will be submitted for laboratory analysis. Please refer to the Form 27 supplemental report dated November 14, 2022 (Document No. 403225420) for more details.

The soil vapor investigation is ongoing. The wells have been plugged and abandoned. Plans are in place to install additional soil vapor points (SVPs) for monitoring stray soil gas prior to cut and cap activities. The SVPs will be installed via hand auger to an approximate depth of 5 to 10 feet below ground surface (bgs) and will be field screened and sampled after installation. Samples will be submitted for gas composition and stable isotope analysis of C1 through C6 hydrocarbons and CO2, if detected. If deeper SVPs are determined to be necessary, an environmental drill rig will be reserved and additional details will be provided in a subsequent Form 27 supplemental report.

SITE INVESTIGATION REPORT

SAMPLE SUMMARY

Soil

Number of soil samples collected 0

Number of soil samples exceeding 915-1

Was the areal and vertical extent of soil contamination delineated?

Approximate areal extent (square feet)

NA / ND

 Highest concentration of TPH (mg/kg)

 Highest concentration of SAR

BTEX > 915-1

Vertical Extent > 915-1 (in feet)

Groundwater

Number of groundwater samples collected 0

Was extent of groundwater contaminated delineated? No

Depth to groundwater (below ground surface, in feet)

Number of groundwater monitoring wells installed

Number of groundwater samples exceeding 915-1

 Highest concentration of Benzene (µg/l)

 Highest concentration of Toluene (µg/l)

 Highest concentration of Ethylbenzene (µg/l)

 Highest concentration of Xylene (µg/l)

 Highest concentration of Methane (mg/l)

Surface Water

0 Number of surface water samples collected

 Number of surface water samples exceeding 915-1

If surface water is impacted, other agency notification may be required.

OTHER INVESTIGATION INFORMATION

☐ Were impacts to adjacent property or offsite impacts identified?

☐ Were background samples collected as part of this site investigation?

☐ Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards)

Volume of liquid waste (barrels)

☐ Is further site investigation required?

The soil vapor investigation is ongoing. The wells have been plugged and abandoned. Plans are in place to install additional SVPs for monitoring stray soil gas prior to cut and cap activities. The SVPs will be installed via hand auger to an approximate depth of 5 to 10 feet bgs and will be field screened and sampled after installation. Samples will be submitted for gas composition and stable isotope analysis of C1 through C6 hydrocarbons and CO2, if detected. If deeper SVPs are determined to be necessary, an environmental drill rig will be reserved and additional details will be provided in a subsequent Form 27 supplemental report. The proposed vapor point locations have been updated since the previous Form 27 Supplemental report dated November 14, 2022 (Document No. 403225420). The new proposed SVP locations are depicted on Figure 4 and Figure 5. Please refer to the Form 19 Initial dated August 25, 2022 (Document No. 430146527). Findings associated with the upcoming vapor point installation and sampling will be detailed in a Form 27 supplemental report.

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No _____

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

If a suspected release is identified and confirmed through soil screening and/or laboratory analysis, soils will be removed and transported to a licensed disposal facility. Disposal records will be kept on file and available upon request.

The soil vapor investigation is ongoing. The wells have been plugged and abandoned. Plans are in place to install additional SVPs for monitoring stray soil gas prior to cut and cap activities. The SVPs will be installed via hand auger to an approximate depth of 5 to 10 feet bgs and will be field screened and sampled after installation. Samples will be submitted for gas composition and stable isotope analysis of C1 through C6 hydrocarbons and CO2, if detected. If deeper SVPs are determined to be necessary, an environmental drill rig will be reserved and additional details will be provided in a subsequent Form 27 supplemental report. The proposed vapor point locations have been updated since the previous Form 27 Supplemental report dated November 14, 2022 (Document No. 403225420). The new proposed SVP locations are depicted on Figure 4 and Figure 5. Please refer to the Form 19 Initial dated August 25, 2022 (Document No. 430146527). Findings associated with the upcoming vapor point installation and sampling will be detailed in a Form 27 supplemental report.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Potential impacts that meet the criteria in Rule 912.b. will be reported to the Director in accordance with that Rule and a site-specific soil and/or groundwater remediation plan will be developed and submitted to the COGCC via a supplemental Form 27 in accordance with Rule 913. If reportable impacts are not encountered, a supplemental Form 27 requesting closure will be submitted within 90 days following completion of sampling activities. Field screening and applicable laboratory analytical results will be reported in all submittals. E&P waste records of material transported off-site are kept on file and available upon request.

The soil vapor investigation is ongoing. The wells have been plugged and abandoned. Plans are in place to install additional SVPs for monitoring stray soil gas prior to cut and cap activities. The SVPs will be installed via hand auger to an approximate depth of 5 to 10 feet bgs and will be field screened and sampled after installation. Samples will be submitted for gas composition and stable isotope analysis of C1 through C6 hydrocarbons and CO2, if detected. If deeper SVPs are determined to be necessary, an environmental drill rig will be reserved and additional details will be provided in a subsequent Form 27 supplemental report. The proposed vapor point locations have been updated since the previous Form 27 Supplemental report dated November 14, 2022 (Document No. 403225420). The new proposed SVP locations are depicted on Figure 4 and Figure 5. Please refer to the Form 19 Initial dated August 25, 2022 (Document No. 430146527). Findings associated with the upcoming vapor point installation and sampling will be detailed in a Form 27 supplemental report.

Soil Remediation Summary

☐ In Situ

☐ Ex Situ

_____ Bioremediation (or enhanced bioremediation)

_____ Excavate and offsite disposal

_____ Chemical oxidation

_____ If Yes: Estimated Volume (Cubic Yards) _____

_____ Air sparge / Soil vapor extraction

_____ Name of Licensed Disposal Facility or COGCC Facility ID # _____

_____ Natural Attenuation

_____ Excavate and onsite remediation

_____ Other _____

_____ Land Treatment

_____ Bioremediation (or enhanced bioremediation)

_____ Chemical oxidation

_____ Other _____

Groundwater Remediation Summary

_____ Bioremediation (or enhanced bioremediation)

_____ Chemical oxidation

_____ Air sparge / Soil vapor extraction

_____ Natural Attenuation

_____ Other _____

GROUNDWATER MONITORING

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

REMEDIATION PROGRESS UPDATE

PERIODIC REPORTING

Approved Reporting Schedule:

☒ Quarterly ☐ Semi-Annually ☐ Annually ☐ Other

☐ Request Alternative Reporting Schedule:

☐ Semi-Annually ☐ Annually ☐ Other

Rule 913.e:

After initial approval of a Form 27, the Operator will provide quarterly update reports in a Supplemental Form 27 to document progress of site investigation and remediation, unless an alternative reporting schedule has been requested by the Operator and approved by the Director. The Director may request a more frequent reporting schedule based on site-specific conditions.

Report Type: ☐ Groundwater Monitoring ☐ Land Treatment Progress Report ☐ O&M Report

☒ Other Stray gas investigation and wellhead closure

Adequacy of Operator's General Liability Insurance and Financial Assurance

Describe the adequacy of the Operator's general liability insurance and Financial Assurance to fully address the anticipated costs of Remediation, including the estimated remaining cost for this project (below).

If this information has been provided on a Form 27 within the last 12 months, provide the Document Number of that form.

KMOG has sufficient insurance and bonding to fully address the anticipated costs of Remediation, including the remaining estimated costs for this project. KMOG currently has over 40 million in bonds with the Colorado Oil and Gas Conservation Commission. The cost for remediation is a preliminary estimate only, costs may change upwards or downward based on site-specific information. KMOG makes no representation or guarantees as to the accuracy of the preliminary estimate.

Operator anticipates the remaining cost for this project to be: \$ 30000

WASTE DISPOSAL INFORMATION

Was E&P waste generated as part of this remediation?

Describe beneficial use, if any, of E&P Waste derived from this remediation project:

Volume of E&P Waste (solid) in cubic yards

E&P waste (solid) description

COGCC Disposal Facility ID #, if applicable:

Non-COGCC Disposal Facility:

Volume of E&P Waste (liquid) in barrels

E&P waste (liquid) description

COGCC Disposal Facility ID #, if applicable:

Non-COGCC Disposal Facility:

REMEDIATION COMPLETION REPORT

REMEDIATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No

If YES:

- ☐ Compliant with Rule 913.h.(1).
- ☐ Compliant with Rule 913.h.(2).
- ☐ Compliant with Rule 913.h.(3).

Do all soils meet Table 915-1 standards? _____

Does the previous reply indicate consideration of background concentrations? _____

Does Groundwater meet Table 915-1 standards? _____

Is additional groundwater monitoring to be conducted? _____

Operator shall comply with the COGCC 1000-Series Reclamation Requirements for all impacted and disturbed areas.

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

The site will be reclaimed in accordance with COGCC 1000 Series Reclamation Rules.

Is the described reclamation complete? _____

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

☐ Interim ☐ Final

Did the Surface Owner provide the seed mix? _____

If YES, does the seed mix comply with local soil conservation district recommendations? _____

Did the local soil conservation district provide the seed mix? _____

SITE RECLAMATION DATES

Proposed date of commencement of Reclamation. _____

Proposed date of completion of Reclamation. _____

IMPLEMENTATION SCHEDULE

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

PRIOR DATES

Date of Surface Owner notification/consultation, if required. 08/25/2022

Actual Spill or Release date, or date of discovery. 08/24/2022

SITE INVESTIGATION DATES

Date of Initial Actions described in Site Investigation Plan (start date). 08/17/2022

Proposed site investigation commencement. 08/17/2022

Proposed completion of site investigation. 09/30/2023

REMEDIAL ACTION DATES

Proposed start date of Remediation. 09/30/2023

Proposed date of completion of Remediation. 11/30/2024

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

☐ Change from approved implementation schedule per Rule 913.d.(2).

Basis for change in implementation schedule:

OPERATOR COMMENT

Upon approval of this Form 27 supplemental report, SVP installation will be scheduled as soon as possible. Private and public utility locates will be performed prior to scheduling installation.

Per the request of the residents of the nearby house, KMOG has offered to reimburse them for the purchase of methane monitors for the interior of their home.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
