**Inspected Facilities:**

Facility ID	Type	Status	Status Date	Well Class	API Num	Facility Name	Insp Status
116587	PIT	AC			-	ILES GATHERIN FACILITIES	EI
116589	PIT	AC			-	ILES DOME SUNDANCE TANK BAT 2/PIT	EI
119213	PIT	AC			-	ILES DOME UNIT	EI
480890	TANK BATTERY	AC	10/07/2021		-	Iles Dome Tank Battery	EI

**General Comment:**

on 1/19/2023 COGCC staff, Kris Neidel inspected the Iles Dome Unit; Tank Battery, Pits and discharge. Weather; heavy snow covered the ground, 15 degrees, clear. The Following was observed; Crews were removing fluid from Pit #1 and transferring the fluid back into the system to remove the oil. It appeared that most of the fluid in Pit #1 was black oil. The tank battery has garden hoses producing water to the concert ditch that leads to the concrete vault. Water was being discharged to Seeping Spring Gulch, the discharge was low (compared to previous inspections) the volume was estimated at ~10 GPM. Oil was observed on the surface of all pits. Oil was observed in Seeping Spring Gulch as rainbows and solids on vegetation and creek bed. It did not appear that any clean up had been started in Seeping Spring Gulch. The wetland near hwy 13 and off of County rd. 49 was mostly frozen over with snow and ice. Corrective Actions: Discharge water shall comply with Table 915-1 concentrations. Impacts to Seeping Spring Gulch soil and water shall be investigated and remediated to Table 915-1 levels. A Form 27, Remediation Work Plan shall be submitted that describes how POC will demonstrate compliance with Table 915-1 and prevent further damage to the Environment.
