OPERATOR COMMENTS AND SUBMITTAL

Comments Desert Eagle Operating proposes to develop helium gas using a single exploratory conventional vertical helium gas well. The well will be drilled with air. There will be no drilling mud, hydraulic fracturing, stimulation, or flowback. The well is not expected to produce hydrocarbons or water, based on results from wells already drilled in this area. The location will be in a remote area on private ranchland. If the well is developed for production, the location will contain only a wellhead. Helium gas will be piped underground to an off-location helium processing unit. Compressed helium will be loaded onto a tube trailer for transport by truck.

Desert Eagle Operating's Form 3 (Doc. No. 403265605) for Financial Assurance was resubmitted on 1/12/23 in response to COGCC comments. The Form 3 status is IN PROCESS pending COGCC approval.
