COGCC INSPECTION SUMMARY:

FIR Document Number: 696105682
Inspection Date: 01/17/2023 FIR Submit Date: 01/19/2023 FIR Status: _____

Inspected Operator Information:

Company Name: ST CROIX OPERATING INC Company Number: 81490
Address: P O BOX 13799
City: DENVER State: CO Zip: 80201

LOCATION - Location ID: 474453

Location Name: ALICE SEEDORF Number: 1 County: _____
Qtrqtr: NESW Sec: 22 Twp: 2N Range: 49W Meridian: 6
Latitude: 40.123560 Longitude: -102.843830

FACILITY - API Number: 05-121-00 Facility ID: 474453

Facility Name: ALICE SEEDORF Number: 1
Qtrqtr: NESW Sec: 22 Twp: 2N Range: 49W Meridian: 6
Latitude: 40.123560 Longitude: -102.843830

CORRECTIVE ACTIONS:

1 CA# 167062

Corrective Action: Operator shall provide topsoil stockpile data (size of stockpile, volume, etc) and photo documentation of topsoil removal in the Field Inspection Report Resolution (FIRR) form.

Date: 01/26/2023

Response: CA COMPLETED Date of Completion: 01/22/2023

Working pad surface 300' x 300' was originally stripped to a depth of 5", 1389 yards. An additional 13" was then stripped and stockpiled, this second pile has a volume of approximately 3611 yards. Total volume of soil removed

Operator Comment: is 5000 yards at an average depth of 18 inches across the pad. The first topsoil pile is on the north edge of the pad, 300 ft long, 5 ft tall average, 15 ft wide. The second topsoil pile is also on north side, south of the first, and it is 300 ft long, an average of 15 ft tall, 35 ft wide. Photos attached document topsoil pile placement and track packing.

COGCC Decision: Approved

COGCC Representative: This corrective action has been completed. The Operator has provided topsoil stockpile data and photo documentation in this FIRR.

2  CA# 167063

Corrective Action: Comply with Rule 1002.f.(2) to install and maintain BMPs in accordance with good engineering practices. Corrective action date is the date the location was observed out of compliance as the location should be in compliance at all times.

Date: 01/17/2023

Response: CA COMPLETED

Date of Completion: 01/17/2023

Operator Comment: The topsoil pile from the original 5" of material stripped was track packed previously, is now frozen, and serves as a BMP protecting the north side of the second topsoil pile. The topsoil piles contain significant clay and are frozen and thus are not subject to wind erosion at this time of year.

COGCC Decision: **Not Approved**

COGCC Representative: This location is out of compliance and is not being approved. This corrective action addressed the perimeter berm BMP and sediment trap on location that were comprised of unconsolidated material. Refer to Inspection Photos Document #696105688 for examples.

OPERATOR COMMENT AND SUBMITTAL

Comment: The location has seen two significant snow storms since construction began. Snow melt runoff from these storms has not caused any off-location sediment transfer. This location will not be receiving any significant rain events during the period between construction and interim reclamation. Interim or final reclamation will be concluded prior to spring when significant rain events could occur. This will be a short duration drilling period (one week). If the well is a dry hole final reclamation will start immediately. If the well is completed as a producer interim reclamation will reduce the pad size to approximately 1/3 acre.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.

Print Name: Ryan Dornbos

Signed: _____
