14. DESCRIBE PROPOSED OR COMPLETED OPERATIONS ON THIS FORM (Clearly state all pertinent details, and give pertinent dates,  
 including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical  
 depths for all markers and zones pertinent

15. DATE OF WORK

As of 11/04/93 the "J" Sand formation in this well remains isolated by a sand plug.  
 In an attempt to remove the sand plug a 3 7/8" drag bit with partial 2 7/8" tbg. joint  
 was lost in the hole on top of the sand plug (+/- 8196' top of fish). The loss of the  
 fish prevents the "J" Sand from ever being reopened for production. At this time  
 there is no indication of any "J" Sand production migrating through the sand plug.  
 The current Codell/Niobrara production does not warrant the risk of making a formal  
 P & A attempt of the "J" Sand at this time.
