Site Investigation and Remediation Workplan (Initial Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

OPERATOR COMMENT

Analytical results of the confirmation soil sampling conducted in October 2021 identified subsurface concentrations of arsenic, sodium adsorption ratio (SAR), and specific conductivity (EC) above the applicable COGCC Table 915-1 Residential Soil Screening Levels (RSSLs). Entrada recommends the collection of a produced water sample in order to understand the chemistry of the produced water, specifically arsenic concentration, and the collection of additional background soil samples to provide additional context for SAR and EC levels.

Based upon soil sampling activities completed at the site and laboratory analytical data presented herein, Entrada recommends that Summit file an initial Form 27 Remediation Workplan with the COGCC. Once the Form 27 is approved, a request for closure should be filed for the initial spill/release report Form 19 (Document #402832169). Any future work will proceed under the Form 27.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
