General Comment:

Reclamation Inspector Kasen Huwa. This is a Final Reclamation Inspection for the well and its associated tank battery. The well was plugged and abandoned on 5/11/2001.

Inspection for overall Final Reclamation is In Process due to field being harvested so crop height could not be compared. Tank battery is addressed under Inspection document 708000172, Location ID 327566.

VEGETATIVE COVER _____

Comment:

The well location appears to meet final reclamation regulations and standards, and appears reflective of reference areas. Unable to find evidence of oil and gas activities and/or disturbances. Tank battery does not appear to meet final reclamation regulations and standards, nor have reflective growth of reference areas. Reclamation should have been conducted within three months of plugging the well, so corrective action is back dated.

Inspection for overall Final Reclamation is In Process due to the field being harvested so crop height could not be compared. Reinspect during the mature growing season in 2023.
