---

Good afternoon Joseph,

Yes, I approve of those BMPs to work in HPHs, thx for avoiding the seasons.

Two minor questions:

- 1) Could Beebe Draw be started after 3/15 vs. on 3/15?
- 2) Could we clarify the definition of "Extreme Winter Storm" to mean measurable snow over say 3" and daytime temps below 20 degrees? Or how is that defined?

Next time, could you please include the TRS so I can include the appropriate CPW field staff?

Regards,

Hey Brandon,

Here is the next series of wells. Let me know if you have any questions.

The BMPs we will be including for the locations below:

BEWNR: KMOG will not conduct operation related to this form between 11/15 – 3/15.

ANSCW: KMOG will implement stormwater BMPs (Including the use of straw wattle) during operations to prevent sediment from leaving the location.

Mule Deer (MD): Between 12/1 through 4/30, KMOG will only perform rig operations during daylight hours, Monday through Friday. KMOG access roads have speed limit restrictions that all personnel will follow. KMOG will shut down operations if an extreme winter storm is anticipated.

Form Type (4/6)	Well/ Location Name	API/ Loc ID#	O
Form 6	UPRC H 09-25D	05-123-30350	P8
