### INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Well has been plugged previously, per COGCC doc #399337. The COGCC Orphan Well Program will verify cement to surface in all annuli with additional cementing as needed and will cut, cap, and bury well per COGCC rules and guidelines. COGCC Orphan Well Program will decommission any associated flowline. Soil samples will be collected in accordance with COGCC Rule 911.a(4) Guidance Document. Samples will be collected from the wellhead excavation and any encountered flowline path and submitted for laboratory analysis of Table 915-1 constituents.

### PROPOSED SAMPLING PLAN

#### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Soil samples will be collected for for laboratory analysis of Table 915-1 constituents in the area showing the highest degree of impact during field screening activities at the wellhead and any encountered flowlines; if no potential impacts are observed, samples will be collected in accordance with COGCC Rule 911.a(4) Guidance Document.

#### Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If a pathway to groundwater is determined or groundwater is encountered during excavation activities, a sample will be collected and analyzed for Table 915-1 constituents.

#### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

### Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

Visual inspection of the well area will occur during abandonment activities. Field personnel will field screen all disturbed areas using visual and olfactory senses to determine if laboratory confirmation sampling is required.
