Site Investigation and Remediation Workplan (Initial Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	SOILS	Undetermined	Soil samples

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Site has not had any spills. During P&A operations, all produced fluids circulated out of the well will be captured in a steel pit. Solids from cementing will be settled out, allowed to harden and taken to Yuma County landfill. Produced and circulated waters will be injected into the Mildred South SWD. Any liquids from flowline will be captured in a steel pit.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Soil samples will be collected at the base of the cut and cap excavation and at the below the water dump of the separator. Samples will be analyzed for Soil Suitability for Reclamation as per Table 915-1 (EC, SAR, pH, and boron). Olfactory and visual senses along with a PID meter will be used to screen all samples including the four walls of the wellhead excavation to identify any suspected impacts. If any concentrations are detected above Table 915-1 allowable levels for soil suitability for reclamation and/or if impacts are suspected during field screening activities, the soil sample/a soil sample from the area exhibiting the highest degree of impacts will be submitted for analysis of all Table 915-1 constituents. Please see the Finch 34-13 Aerial Image attachment for a sampling diagram.

Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

If groundwater is encountered during facility decommissioning activities, a minimum of one grab sample will be collected as soon as practical. Groundwater samples will be submitted to an accredited laboratory for analysis of benzene, toluene, ethylbenzene, total xylenes (BTEX), naphthalene, 1,2,4, -trimethylbenzene (1,2,4-TMB), and 1,3,5-trimethylbenzene (1,2,5-TMB), using standard methods appropriate for detecting the target analytes in Table 915-1 of COGCC 900 Series rules.

Proposed Surface Water Sampling

REMEDIAL ACTION PLAN

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Any hydrocarbon impacted material will be transported offsite to a licensed disposal facility in accordance with Rules 905 and 906.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

If a suspected or actual Spill or Release of is discovered, as defined in Rule 912.b, a Form 19i will be submitted within 24-hours of discovery and a site-specific remediation plan will be developed and submitted via a supplemental Form 27. If reportable impacts are not encountered, a supplemental Form 27 closure request will be submitted within 90 days of abandonment and/or decommissioning activities.

COA Type**Description**

	Approval of this Form 27 does not supersede any Federal, State or Local regulations. Operator shall consult Colorado Parks and Wildlife prior to decommissioning activities.
	COGCC agrees to the proposed reduced analyte list based on Operator's process knowledge and site-specific history. However, if impacts are found Operator shall analyze soil and groundwater (if applicable) samples for complete Table 915-1 Contaminants of Concern until Operator has submitted sufficient characterization data to request and receive Director Approval of reduced list of contaminants of concern.
