WELL ABANDONMENT REPORT

This form is to be submitted as an Intent to Abandon whenever an abandonment is planned on a borehole. After the abandonment is complete, this form shall again be submitted as a Subsequent Report of the actual work completed. The approved intent shall be valid for six months after the approval date, after that period, a new intent will be required. Attachments required with the Intent to Abandon are wellbore diagrams of the current configuration and the proposed configuration with plugs set.

A Subsequent Report of Abandonment shall indicate the actual work completed. Attachments required with a Subsequent Report are a wellbore diagram showing plugs that were set and casing remaining in the hole, the job summaries from all plugging contractors used, including wireline and cementing (third party verification) and any logs that may have been run during abandonment.

OGCC Operator Number: 10779

Contact Name: JARED EDE

Name of Operator: SCOUT ENERGY MANAGEMENT LLC

Phone: (956) 454-6259

Address: 13800 MONTFORT DRIVE SUITE 100

Fax:

City: DALLAS State: TX Zip: 75240

Email: Jared.Ede@scoutep.com

For "Intent" 24 hour notice required,

Name: Kellerby, Shaun

Title: Regulatory Analyst Date: 2/9/2023 Email: anita.sanford@scoutep.com

Based on the information provided herein, this Well Abandonment Report (Form 6) complies with COGCC Rules and applicable orders and is hereby approved.

COGCC Approved: Katz, Aaron Date: 3/13/2023

CONDITIONS OF APPROVAL, IF ANY:

Expiration Date: 9/12/2023

COA Type	Description
	<p>1)Provide electronic Form 42 Notice of MIRU 2 business days ahead of operations and electronic Form 42 Notice of Plugging Operations 48 hours prior to mobilizing for plugging operations.</p> <p>2)The approved Form 6, Notice of Intent will be at the location during all phases of plugging operations.</p> <p>3)Operator shall implement measures to control venting and to ensure that vapors and odors from well plugging operations do not constitute a nuisance or hazard.</p> <p>4)If applicable properly abandon flowlines as per Rule 1105. Pursuant to Rule 911.a. Closure of Oil and Gas Facilities, Operator will submit Site Investigation and Remediation Work plans via Form 27 for COGCC prior approval before cutting and capping the plugged well, conducting flowline abandonment, and removing production equipment. Pursuant to Rule 1105.f. Abandonment Verification, within 90 days of an operator completing abandonment requirements for a flowline or crude oil transfer line, an operator must submit a Field Operations Notice, Form 42-Abandonment of Flowlines for on-location flowlines, and a Flowline Report, Form 44, for off-location flowlines or crude oil transfer lines.</p>
	Due to proximity to surface water, Operator will review the stormwater program and implement stormwater BMPs and erosion control measures as needed to prevent fine-grained sediment and impacted stormwater runoff from entering surface water.

General Comments

<u>User Group</u>	<u>Comment</u>	<u>Comment Date</u>
Engineer	Operator Note: Casing sticking out of dirk bank, unable to TD stacked out at 15' Changed casing table details per DOC566908 to report total TD of the well at 1000 ft. No production data due to well not being utilized for production since COGCC began digital records No zones to report, there is no historical data communicating production details Well has one joint of casing and then open hole, thus there is no bradenhead annulus. Bradenhead testing is not required due to wellbore configuration There are no domestic water wells within 1 mile There is no offset Wasatch G production within 1 mile This is a historical well with little information and documentation available	02/28/2023
OGLA	OGLA review is complete	02/22/2023
OGLA	Well is in a Mule Deer Winter Concentration area. Although plugging and abandonment operations with heavy equipment will be allowed, the operator is strongly encouraged to avoid them between December 1 through April 30.	02/22/2023
OGLA	This oil and gas location is within CPW-mapped Greater Sage-Grouse General Habitat Management Area. CPW recommends that disturbance activities occur outside the period from March 1 to July 15 to protect the lekking, nesting, and brood-rearing periods for greater sage-grouse.	02/22/2023
OGLA	This oil and gas location is within CPW-mapped Elk Winter Concentration area. CPW recommends that disturbance activities occur outside the period of December 1 to April 30.	02/22/2023
Permit	Submit "as drilled" GPS data on Subsequent Report of Abandonment. GPS data must meet the requirements of Rule 216.	02/17/2023
