---

Good Afternoon,

LN Hagood 15 was a mess and the rain conditions are not great for heavy equipment. The pooled up water has been drained and the berm repaired. We also took a track hoe and pulled the sediment from the snow removal outside of the berm back onto the location just inside of the berm. Please see photos.

Once conditions allow we will bring in the road grader and grade the location.

Im not sure what else we can do in these conditions to meet the expectations. Let me know your thoughts.
