

# ANALYTICAL REPORT

## PREPARED FOR

Attn: Chris Sanchez  
Evergreen Natural Resources LLC  
27000 Hwy 12  
Trinidad, Colorado 81082

Generated 2/17/2023 1:20:30 PM

## JOB DESCRIPTION

Soil Suite

## JOB NUMBER

280-171979-1

# Eurofins Denver

## Job Notes

The test results in this report relate only to the samples in this report and meet all requirements of NELAC, with any exceptions noted. Pursuant to NELAP, this report shall not be reproduced except in full, without the written approval of the laboratory. All questions regarding this report should be directed to the Eurofins TestAmerica Denver Project Manager.

The Lab Certification ID# is 4025.

Reporting limits are adjusted for sample size used, dilutions and moisture content if applicable.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins TestAmerica Project Manager.

## Authorization

## Qualifiers

### GC/MS VOA

Qualifier	Qualifier Description
*+	LCS and/or LCSD is outside acceptance limits, high biased.

### GC/MS Semi VOA

Qualifier	Qualifier Description
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
F1	MS and/or MSD recovery exceeds control limits.

### GC Semi VOA

Qualifier	Qualifier Description
*-	LCS and/or LCSD is outside acceptance limits, low biased.
F1	MS and/or MSD recovery exceeds control limits.
F2	MS/MSD RPD exceeds control limits

### Metals

Qualifier	Qualifier Description
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
F1	MS and/or MSD recovery exceeds control limits.

### General Chemistry

Qualifier	Qualifier Description
HF	Field parameter with a holding time of 15 minutes. Test performed by laboratory at client's request.

## Glossary

### Abbreviation

These commonly used abbreviations may or may not be present in this report.

□	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points

**Job ID: 280-171979-1**

**Laboratory: Eurofins Denver**

Narrative

## CASE NARRATIVE

**Client: Evergreen Natural Resources LLC**

**Project: Soil Suite**

**Report Number: 280-171979-1**

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

This report may include reporting limits (RLs) less than Eurofins TestAmerica's standard reporting limit. The reported sample results and associated reporting limits are being used specifically to meet the needs of this project. Note that data are not normally reported to these levels without qualification because they are inherently less reliable and potentially less defensible than required by the latest industry standards.

This submission may contain field data obtained by the sampler. The methods referenced in this submission for the field data results may not be the methods used to obtain the field data by the sampler.

### **RECEIPT**

The samples were received on 2/3/2023 9:15 AM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 2.8° C.

### **RECEIPT EXCEPTIONS**

There is evidence of a possible leak in the soil jars received. There is some water mixed in with the soil sample: Chateau 34-14 SS1 (280-171979-1), Chateau 34-14 SS2 (280-171979-2), Chateau 34-14 SS3 (280-171979-3), Chateau 34-14 SS4 (280-171979-4) and Chateau 34-14 SS5 (280-171979-5).

Analyses not listed on COC were added per client request on 2/3/2023.

### **VOLATILE ORGANIC COMPOUNDS (GC/MS)**

The laboratory control sample duplicate (LCSD) for preparation batch 280-601676 and 280-601676 and analytical batch 280-601604 recovered outside control limits for the following analyte. Toluene 125%R(77-122)%R This analyte was biased high in the LCSD and were not detected in the associated samples; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

### **SEMOVOLATILE ORGANIC COMPOUND (GC/MS SIM)**

Due to the matrix consisting of non-homogenous compact clay and/or, sludge-like clay, five grams was used for the initial volume instead of fifteen grams which deviated from the standard procedure in order to prevent equipment damage, and microwave vents: Chateau 34-14 SS1 (280-171979-1), Chateau 34-14 SS2 (280-171979-2), Chateau 34-14 SS3 (280-171979-3), Chateau 34-14 SS4 (280-171979-4), Chateau 34-14 SS5 (280-171979-5), (280-171979-A-5 MS) and (280-171979-A-5 MSD) in preparation batch 280-601578 . The reporting limits (RLs) have been adjusted proportionately.

The following samples in preparation batch 280-601578 and analytical batch 280-602070 were diluted due to the nature of the sample matrix : Chateau 34-14 SS1 (280-171979-1) and Chateau 34-14 SS2 (280-171979-2). As such, surrogate recoveries are below the calibration range or are not reported, and elevated reporting limits (RLs) are provided.

# Case Narrative

Client: Evergreen Natural Resources LLC  
Project/Site: Soil Suite

Job ID: 280-171979-1

## Job ID: 280-171979-1 (Continued)

### Laboratory: Eurofins Denver (Continued)

The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 280-601578 and analytical batch 280-602070 were outside control limits high for Chrysene . Sample matrix interference is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

### GASOLINE RANGE ORGANICS (GRO)

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

### DIESEL RANGE ORGANICS

Due to the matrix consisting of a dark sticky clay, the initial volumes used for the following samples Chateau 34-14 SS1 (280-171979-1), Chateau 34-14 SS2 (280-171979-2), Chateau 34-14 SS3 (280-171979-3), Chateau 34-14 SS4 (280-171979-4) and Chateau 34-14 SS5 (280-171979-5) in preparation batch 280-601829 deviated from the standard procedure. One and a half grams were used instead of the full fifteen grams to prevent damage and venting in the microwave. The reporting limits (RLs) have been adjusted proportionately.

The following samples Chateau 34-14 SS1 (280-171979-1), Chateau 34-14 SS2 (280-171979-2), Chateau 34-14 SS3 (280-171979-3), Chateau 34-14 SS4 (280-171979-4) and Chateau 34-14 SS5 (280-171979-5) in preparation batch 280-602411 could not be thoroughly homogenized before sub-sampling was performed due to sample matrix: The samples were a sticky clay that was difficult to break down into pieces smaller than 1/2".

Due to the matrix consisting of a sticky clay, the initial volumes used for the following samples Chateau 34-14 SS1 (280-171979-1), Chateau 34-14 SS2 (280-171979-2), Chateau 34-14 SS3 (280-171979-3), Chateau 34-14 SS4 (280-171979-4) and Chateau 34-14 SS5 (280-171979-5) in preparation batch 280-602411 deviated from the standard procedure. One and a half grams were used instead of the full fifteen grams to prevent damage and venting in the microwave. The reporting limits (RLs) have been adjusted proportionately.

The laboratory control sample (LCS) and matrix spike / matrix spike duplicate (MS/MSD) for preparation batch 280-602411 and analytical batch 280-602484 recovered outside control limits for the following analyte: Diesel Range Organics [C10-C28]. The associated samples were re-prepared and re-analyzed due to low recovery in the LCS and MS/D in prep batch 601829. Sample matrix interference is possible in the MS/MSD; therefore, the data have been reported. Method 8011

The matrix spike / matrix spike duplicate (MS/MSD) precision for preparation batch 280-602411 and analytical batch 280-602484 was outside control limits for Diesel Range Organics [C10-C28]. Possible matrix interference. Method 8011

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

### METALS (ICP/ICPMS)

The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 280-601362 and analytical batch 280-602037 were outside control limits for one or more analytes, see QC Sample Results for detail. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery is within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

### GENERAL CHEMISTRY - VARIOUS

Method 7196A: The following samples were diluted due to the nature of the sample matrix: Chateau 34-14 SS1 (280-171979-1), Chateau 34-14 SS2 (280-171979-2), Chateau 34-14 SS3 (280-171979-3), Chateau 34-14 SS4 (280-171979-4) and Chateau 34-14 SS5 (280-171979-5). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Arvada, CO 80002  
Phone: 303-736-0100 Fax: 303-431-7171

**Note:** Since laboratory accreditations are subject to change, Eurofins TestAmerica places the ownership of method, analytic & accreditation compliance upon our subcontract laboratories. This sample shipment is forwarded under chain-of-custody. If the laboratory does not currently maintain accreditation in the State of Origin listed above for analysis/testmatrix being analyzed, the samples must be shipped back to the Eurofins TestAmerica laboratory or other instructions will be provided. Any changes to accreditation status should be brought to Eurofins TestAmerica attention immediately. If all requested accreditations are current to date, return the signed Chain of Custody attesting to said compliance to Eurofins TestAmerica.
