**INITIAL ACTION SUMMARY**

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

This form has been prepared to summarize assessment activities conducted during the closure of one aboveground storage tank (AST), one produced water vessel (PWV), one emission control device (ECD), one meter house, and one separator at the Hunter 10&15-32 O SA Facility. The AST, PWV, ECD, meter house, and separator were permanently removed. Assessment activities began on December 2, 2022. Soil assessment activities were conducted in accordance with COGCC Rule 911.a. A photo log is included as an attachment.

**PROPOSED SAMPLING PLAN**

**Proposed Soil Sampling**

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

On December 2, 2022, soil samples were collected from the AST, PWV, ECD, meter house, separator and ancillary piping (see Figure 1). The soil samples were field screened for total volatile organic compounds using a photoionization detector (PID). One soil sample from the AST, two samples from the PWV, and two samples from the separator were submitted for laboratory analysis. Based on PID readings, no additional samples were submitted for analysis. Analytical results indicated soil was in full compliance with Table 915-1 standards or within the background sample concentrations. The PID readings and soil sample results are summarized in Tables 1 and 2, respectively. The laboratory report is attached.

**COA Type****Description**

	<p>Based on the information presented, the elevated pH sample appears to be similar to background pH; therefore, elevated pH may not be associated with E&amp;P activities. It appears that no further remedial action is necessary at this time and the COGCC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or background levels or if groundwater is found to be impacted, then further investigation and/or remediation activities may be required.</p> <p>The surface area disturbed by the remediation activity shall be reclaimed in accordance with the 1000 Series Reclamation Rules. For locations with active ongoing oil and gas operations, comply with Rule 1003 interim reclamation requirements and for locations that will no longer have active oil and gas operations, comply with Rule 1004 Final Reclamation requirements.</p>
