Comment	Areas of the location not needed for production have been reduced and reclaimed. No noxious weed concerns were observed at the time of this inspection. Interim areas appear vegetated with native shrubs (sagebrush, four-wing saltbush) and occasional introduced and native perennial grasses (crested and western wheatgrass). However, full vegetation assessment was not possible due to dormant season. A follow up inspection will be conducted during a future growing season to determine compliance with 1003 requirements.
