COMMENTS:

TEP Rocky Mountain LLC (TEP) respectfully reports the results of recent diagnostic testing on the Jackson 16-28. The diagnostic testing resulted from the bradenhead exceeding the threshold pressure on February 8, 2023. The Form 17 reporting the results of the recent bradenhead test is included in the "Related Forms" section. TEP monitored the bradenhead pressure after performing the bradenhead test and determined that the bradenhead pressure will build and sustain pressures exceeding the Bradenhead Monitoring Area (BMA) threshold pressure of 150 psi. TEP is currently experiencing supply chain issues and limited construction crew availability but has scheduled the bradenhead on the Jackson 16-28 to be connected to the sales line as part of a Pressure Management Plan for this well. TEP will report to the COGCC when the bradenhead connection to the sales line is completed.
